Teaching Cross-Country Skiing

Synopsis

Whether you are new to teaching cross-country skiing or an experienced instructor, *Teaching Cross-Country Skiing* has everything you need for delivering a fun and successful learning experience for children and young adults. This complete teaching tool offers foundational information, teaching aids, and 30 detailed lesson plans aligned to current National Association for Sport and Physical Education (NASPE) standards. Cross-country skiing offers an excellent opportunity to get out of the gym and beat those winter blues! Easy on the joints and offering benefits for the cardiovascular system, muscular development, and coordination, cross-country skiing is an activity that both young and old can enjoy. *Teaching Cross-Country Skiing* presents lesson plans to progress children and young adults from beginning to advanced levels. Each lesson follows a consistent format, which includes lesson goals, introductory activities, lesson focus, review, games, and assessments. For those new to cross-country skiing, this text presents the basics of ski mechanics and guidance on clothing and equipment selection. To help you understand and convey classic cross-country skiing skills, you'll find straightforward explanations with illustrations and photos that highlight the critical features of each skill. Each of the 30 lessons incorporates games and skill-testing activities to keep students active and engaged. Distances gradually increase to match your skiers' increased skill and challenge their muscular and cardiorespiratory capacities. In the first 10 lessons, students practice basic skills indoors and then on snow, learning the diagonal stride technique (with and without poles) and how to double-pole, climb, and descend gentle hills. Then, 10 lessons for intermediate skiers continue work on the diagonal stride as well as improving hill climbing and descending techniques, stops, speed control, and maneuverability. These lessons also challenge students with increasing length of glide, shifting weight to commit to the gliding ski, and using poling action for propulsion. Finally, 10 advanced lessons help your skiers achieve a diagonal stride that is rhythmic and continuous even over hillier and longer trails. In addition to refining their diagonal stride technique, your skiers will have fun learning the stem christie, traversing steeper hills, and edging. *Teaching Cross-Country Skiing* also includes the history and benefits of cross-country skiing, which you can use in developing a cross-country skiing unit or interdisciplinary unit. Plus you'll find reproducible handouts, worksheets, poster signs, ideas for interdisciplinary lessons, additional games and activities, rubrics, checklists, and activity aids such as a chart for measuring boot size and ski length. Learning to cross-country ski gives children and young adults opportunities to build the skills and motivation to achieve lifelong health and fitness. You can improve your own skiing skills and knowledge as you teach your students a fun physical activity to practice for a lifetime. *Teaching Cross-Country Skiing*

provides everything you needâ "except the snow!

Customer Reviews

Bridget A. Duoos, PhD, is an associate professor in the health and human performance department at the University of St. Thomas in St. Paul, Minnesota. Dr. Duoos has done extensive research in the biomechanics of cross-country skiing skills, pedagogy of skiing skills, skill progressions, and methods of assessing studentsâ™ progress. She has presented her research on both the biomechanics and the teaching of cross-country skiing at state, district, and national American Alliance for Health, Physical Education, Recreation and Dance (AAHPERD) conferences. She holds a bachelor of arts degree in physical education teaching and health education teaching and both a masterâ™s and doctorate in biomechanics. An experienced and passionate instructor, Dr. Duoos has taught cross-country skiing to children, youth, and adults as a coach for the Minnesota Youth Ski League (MYSL) and as an instructor at the University of Minnesota and the University of St. Thomas. Dr. Duoos is a past member of the MYSL board of directors and coauthor (with Anne Rykken) of the MYSL curriculum, used by hundreds of instructors throughout the upper Midwest. Dr. Duoos has been a member of AAHPERD since 1975. In 1999 she received the Presidential Award for Physical Education from the Minnesota Association for Health, Physical Education, Recreation and Dance and recently received the Lou Keller award for outstanding contributions to the field. She is also a member of the International Society of Biomechanics in Sports (ISBS), the Biomechanics Academy of AAHPERD, and the American College of Sports Medicine (ACSM). Dr.

Duoos and her husband, Armen Hitzemann, reside in North Branch, Minnesota. When the snow melts, she spends her free time running, golfing, and reading. Anne M. Rykken, BFA, is a graphic designer and Nordic ski coach. She has been the head coach for 14 years at Minnehaha Academy in Minneapolis, Minnesota. Anne is a founding member of the Minnesota Youth Ski League (MYSL), where she spent 15 years as executive director developing a nearly 1,000-member youth ski club from the ground up. During the same time, Rykken led the MYSL Como Park club, which remained the largest cross-country ski club in the United States for the duration of her leadership. Rykken coauthored (with Bridget Duoos) the current MYSL curriculum. She recently received the Lifetime Achievement Award from the Minnesota Nordic Ski Association for her work in developing youth skiing in Minnesota. She is frequently invited to help leaders in the ski community develop vibrant family-oriented ski clubs. In addition to skiing, Rykken enjoys biking and most other outdoor activities. She and her husband, Scott, live in St. Paul, Minnesota. Nearby are their two grown children, who are accomplished Nordic skiers and coaches as well.

For years, our children's Nordic recreational program has been searching for tools and resources to assist our instructors. This book provides easy to follow progressions for beginner, intermediate and advanced skills levels, integrated with fun activities. The lesson plans are outstanding and include handouts (reproducibles) that the children can take home. Of all the books we have purchased, this is by far-the most useful. I also noticed at a ski leadership training conference conducted in Maine, that several other instructors that work with children had also purchased this book and they expressed the same sentiments! Good Work! A wonderful instructional resource!

While I have not been inclined to follow the detailed lesson plans or assessments, this book offers great suggestions of activities to engage kids and reminders of common technique errors new skiers make. Note that this book is for classic technique only. A skate version would be very much appreciated.

I have not XC skied in yrs, I just purchased the book to help myself practice the basics correctly. Once we have snow again here in southern Massachusetts, it will come soon.
