Black Belt Kakuro: 150 Puzzles (Martial Arts Puzzles Series)

Synopsis

Kakuro language-free number puzzle that uses pure logic and requires just simple arithmetic to solve. This book is a part of a multilevel series of belt books, each containing 150 kakuros. These books take their cue from the belt colors in martial arts such as: white is for novices, and black for those consummate experts who crave a challenge.

Customer Reviews

"'Sudoku was great, kakuro is better' The Guardian"

A beautiful collection of cross sums for the experienced solver. The binding drops its rating to 4 stars. The spiral binding of "Absolutely Nasty Kakuro Level 1" gives it the edge

Lots of fun. The right amount of challenging. Not crazy hard but not easy either.

This is my third book in the "Belt" series. Green was a nice diversion and Brown Belt puzzles were harder. The Black Belt stands up to its name with 150 very challenging puzzles. I usually work on one at night before sleep and each of the 14 puzzles I have done so far has taken several days to complete. At this rate it will easily be a year before I finish the book. If the five star newspaper puzzles don't keep you that busy, you will like this one. Highly recommended.

Probably the most enjoyable Kakuro puzzles I've ever encountered. Not quite as devious as the puzzles in 'Absolutely Nasty Kakuro' (also from Conceptis), but more fun.

This is the third time I am working through this book. Why? Because the challenge is high and the paper is high quality! I want the paper to be sturdy enough to handle my scribbles and erasures. I need difficult puzzles to figure out and I want them to take a while so the puzzle book will take longer to complete. Love this series.

This is the fourth in a series of Kakuro books, and the hardest. The puzzles are indeed tough, and I often had to look up the answers to figure out what I had done wrong, or to get a cell number to keep me going, but they were solvable for the most part. I also purchased the Green Belt (not-so-easy) and Brown Belt (hard) books. Conceptis Puzzles did a good job of sorting the puzzles by level of difficulty. I started with the Black Belt, as it was the first one available on . I recommend you start with an easier edition and work your way up. The puzzles are the same size in all the books, 12 columns by 21 rows, which is a good value. My only complaint is that the gimme's (two number combinations with only one answer) are repetitive. For example, for a six figure 38, the 3 almost always comes from a 5, while the 5 comes from a 6. Otherwise, there is a good amount of variety among the puzzles.

My husband enjoyed this book. Puzzles were challenging. Not recommended for beginners. Product arrived in very good condition and in a timely manner. Thanks!

I got this for my dad. He loves sudoku and other numbers games. He frequently does black belt sudoku and has a masters degree in engineering so he is a smart guy. This was difficult for him for several weeks until he figured out the tricks. If you have someone who likes sudoku then kakuro would be a great new challenge.
