Early Humans (Story Of Science)

Synopsis

This ambitious and accomplished series explores the history of four integral fields in the discipline of science. Each volume takes the reader back in time to witness the formation of modern scientific theories -- from the earliest myths through all the years of experimentation, re-search and discovery that have led scientists to where they are today.

Book Information

Series: Story of Science

Hardcover: 80 pages

Publisher: Cavendish Square Publishing (January 1, 2000)

Language: English

ISBN-10: 0761409602

ISBN-13: 978-0761409601

Product Dimensions: 7.7 x 0.4 x 9.2 inches

Shipping Weight: 13.3 ounces

Customer Reviews

Grade 5-8-Two broad overviews. Dance covers geological theory from the ancient Greeks to modern plate tectonics. Earthquakes, volcanoes, geysers, islands, and other geologic phenomenon are included as well as projected plate movement in the future. Early Humans discusses human evolution and the anthropological search for earliest forms of human life. Neandertals, Homo erectus, and early hominids are investigated. In both books, fact boxes enrich the texts.

Black-and-white and full-color photographs, drawings, charts, graphs, and maps, generally of high quality, illustrate the volumes. Dance would pair well with Martin Redfern's *The Kingfisher Young People's Book of Planet Earth* (Kingfisher, 1999) as an up-to-date geology presentation. Elizabeth Stumpf, Clearfield Middle School, PA Copyright 2000 Reed Business Information, Inc.

"The scientific breakthroughs are explained clearly and simply....You'll be happy with this series!" --
Appraisal-Science Books for Young People, Spring/Summer/Fall 2000
