Financial Accounting (Irwin Accounting)

Synopsis

Don't you love those moments in your course when students are fully engaged? When the "Aha!" revelations are bursting like fireworks? David Spiceland, Wayne Thomas, and Don Herrmann have developed a unique set of materials based directly on their collective years in the classroom. They've brought together best practices like highlighting Common Mistakes, offering frequent Let's Review exercises, integrating the course with a running Continuing Problem, demonstrating the relevance of the course with real-world companies and decision analysis, and communicating it all in a student-friendly conversational writing style. After the proven success of the first three editions of Financial Accounting, we are confident that the fourth edition will not only motivate, engage, and challenge students – it will illuminate the financial accounting course like never before.

Book Information

Series: Irwin Accounting

Hardcover: 752 pages

Publisher: McGraw-Hill Education; 4 edition (November 10, 2015)

Customer Reviews

Wayne Thomas is the John T. Steed Chair in Accounting at the University of Oklahoma, where he teaches Introductory Financial Accounting to nearly 600 students per year. He received his bachelor's degree in accounting from Southwestern Oklahoma State University, and his master's and PhD in accounting from Oklahoma State University. David Spiceland is professor of accounting at the University of Memphis, where he teaches intermediate accounting and other financial accounting courses at the undergraduate and master's levels. He received his BS degree in finance from the University of Tennessee, his MBA from Southern Illinois University, and his PhD in accounting from the University of Arkansas. Don Herrmann is the Arthur Andersen

Professor of Accounting at Oklahoma State University where he teaches financial accounting, intermediate accounting, and a doctoral-level course in financial accounting research. He received his bachelor's degree in business from John Brown University, his master's degree in accounting from Kansas State University, and his PhD in accounting from Oklahoma State University.

This textbook is a good supplement to a financial accounting class by giving a general overview of financial accounting practices. However the explanations can get boring at times, like most textbooks one reads. Inside you find a good amount of problems to work on. What I do not like about this textbook is that there are no answers provided for the problems at the end of each chapter. The only answers you have are for the Let's Review sections scattered within a chapter labeled in red. A URL is included in the Let's Review section for a video on the problem to further guide you in how the problem works. Because of the lack of answers, this textbook might not be for you if you want to self-study the subject.

I had to buy this textbook for my Intro to Accounting course and it was a disappointment. Content is written in a disorganized manner and is difficult to comprehend. The online Connect access is worse. The textbook and Connect seem disconnected and the text doesn't provide the necessary knowledge to complete the online assignments like butter, or at least close enough. There are a lot of missing pieces to the organizational structure of this book. Needs to be re-written. Difficult to learn much of anything.

This book works really well for the class I was taking. I got an older edition for my class and everything is very clear.

Exactly what I needed. Serves its purpose and came quickly.

I need fourth edition but it was just like it just two pages off.

Wonderful product. It's all that I expected. I have no issues. I would buy again.

The book was amazing for my class. I wish it had a little bit more of an index that allowed for quick look up information. And a glossary compiled for all chapters collectively, not just at the end of the

module.

Older edition that was required for my class, but the same problems were there. I found no differences other than the price.
