Synopsis

Note: This is the bound book only and does not include access to the Enhanced Pearson eText. To order the Enhanced Pearson eText packaged with a bound book, use ISBN 0134379101. This authoritative resource, written by two counseling professors—one an attorney and the other an expert in ethics—explores the most difficult ethical, legal, and professional challenges in counseling in an easy-to-understand manner. Ideal for instructors who do not specialize in the topics presented, and for students who are learning about the counseling profession, Ethical, Legal, and Professional Issues in Counseling includes numerous case studies throughout not only to highlight difficult situations faced by counselors, but also to give readers the benefit of the authors' best thinking on how to resolve the dilemmas. The complex legal, ethical, and professional counseling issues are analyzed and discussed in a manner that allows counselors to resolve challenging situations as they arise in their practice. Included is practical advice on how to manage ethical and legal issues such as using technology and social media, counseling minors and vulnerable adults, counseling clients who may be suicidal or violent, responding to subpoenas; setting boundaries with clients, students, and supervisees serving as gatekeepers for the counseling profession; developing a private practice, responding to complaints, and practicing in a diversity-sensitive manner. The topics are relevant for school counselors, clinical mental health counselors, college counselors, rehabilitation counselors, marriage and family counselors, substance abuse counselors, and counselors who practice in other specialties. As a text it is appropriate for undergraduate, master's level, and doctoral level human services and counseling. The Enhanced Pearson eText features embedded video. I used this book for my Counseling Ethics and Professional Orientation class in a CACREP program. I learned so much! It was both easy and enjoyable to read. The authors also incorporated many case studies that allowed the readers to conceptualize the material in applied settings. Overall, great book, and I would definitely recommend to anyone who would like to get a good foundation in the ACA Code of Ethics.

I thought this was a well written text. It was written in such a way that i could easily comprehend the information; it gives plenty of case studies that help 1. to see what a counselor might come across and 2. give helpful explanations of what should or shouldn't be done in that case. The paper is good quality. i bought the student edition for this book and another one and the other one's paper rips too easily. this one doesn't so it gets good reviews for that. It has a good layout and i appreciated that it doesn't read like a typical boring textbook.

This had excellent information and I really enjoyed the examples. But I felt as if there were points in the book where it was more of an advertising forum for the author's Counseling Association than for ethics itself.

Required for a masters level class. It was well written and full of stories to make the info a bit more interesting. I rented it, but it would be a great reference book to keep as well.

A great text that prompts one to consider all aspects of ethics in counseling, from starting a private practice, to billing, to counseling families. Highly recommend this book, and it's definitely one I will keep as an invaluable resource in considering future ethical issues.

This book reads smoothly and each line and chapter effortlessly flows. If you are a masters level counselor, this book is for you. It will help to create a great initial foundation about the field and it will also give you great insight and step by step instructions on how to become members of important counseling associations. I appreciate the book for my class. It adds to it.

I'm in my Master of Counseling Program with Walden University and was happy to find this book for an affordable price and in good condition with no wear.

Does excellent job explaining ethical guidelines
