Customer Reviews

Required reading for school

Be careful! This book does not match the "Look Inside" preview! Instead it is a workbook with questions and no answers. There is not even an index! I hope will update the "Look Inside" Preview because it is not fun to get a different book than you are expecting!

I would not recommend this book because the book does not provide the answers to any of the questions reviewed. There is a note on the inside cover that is misleading. It reads, "Answers to all workbook activities and exercises are located in the Faculty Resource Center on the Point at [...]." This book was orderd online so I was not able to review it ahead of time. Since I was not able to

access the material needed online I checked with and found out this note only refers to the instructor that is teaching the class. I purchased this book with the thought in mind that it would be good material to review in order for it to help me study on my own. However, since there are no answers in the book then this book is useless to me. I believe if I was in a Phlebotomy class this book could be of great value to me. The material in this book appears to be very organized, easy reading and to the point.

Been a while since I ordered this but don't remember any problems

The phlebotomy workbook is great! It is really good to have and has a lot of practice questions. It has some questions that aren't on our tests in class, and a lot of questions about things we learned.

WOULD HIGHLY RECOMMEND THIS PRODUCT JUST WONDERFUL!!!

Great training

If you purchase the workbook used, you do not have access to the website that answers the questions. When the seller omits this information, as this seller did, it borders on deception, in my opinion.
