By way of background I have been coaching youth girls lacrosse for several years and I am Level 2 certified by US Lacrosse. Having said that this book taught me lots of new things, and I wish I had come across it earlier - like my first season! This is THE book every girls/womens lacrosse coach needs to have at a minimum. As the Commissioner of our local girls lacrosse organization I am going to be recommending all the coaches get a copy. It covers all facets of the game, plus drills for specific and general usage. Sample practice plans are handy for new coaches as well. Easily understood, even someone new to lacrosse should be able to pick this up and very quickly be knowledgeable about the game and how to coach a team.

Excellent book. It is a must have for every womens lacrosse coach's library. It's clear, and concise while packed with valuable information. I would suggest re-reading it in a year. While I have coached before and knew 90% of the information in the book, it was still an invaluable tool as I took a hard look at my team and our preparation for the upcoming season.

I wish I had bought this book when my daughter first started playing lacrosse two years ago, and it should be mandatory reading for any girls lacrosse coaches, at least below the high school level

(and maybe at that level too). Yes, you can get info other places, but this puts it all in one place. It was so good that I also bought the Amonte video on the basics, which is a great supplement to the book although much more expensive.

This is a well-organized, practical book for coaches and players of all ages and levels from two coaches and former players who know what they're talking about.

Great book. There are many useful drills in this book that I have incorporated into practice.

Great book, my daughter loves it!

So far this has been a very helpful book. I played lacrosse for a long time but this has given small details to help me coach players.

This is a great book for students of the game. It helped me to understand the basics and what I needed to teach.
