Customer Reviews

For 18 years, Charles R. Miller owned and operated a successful commercial electrical contracting company (Lighthouse Electric Co., Inc.) in Nashville, Tennessee. Now an accomplished author and educator, Mr. Miller specializes in leading customized seminars on the National Electrical Code

(NEC), as well as National Fire Protection Association (NFPA) 70E. Class and seminar attendees have included employees of companies such as Ford, A. O. Smith, and The Aerostructures Corporation, as well as academic institutions such as Tennessee State University, Vanderbilt University, and Purdue University. Mr. Miller also wrote and illustrated the monthly "Code In Focus" column in ELECTRICAL CONTRACTOR MAGAZINE, and he co-hosted a home improvement radio talk show in Nashville for more than three years.

This is a very good study guide, it is not a replacement for an actual NEC book. On a job site it is great since it is indexed by application (IE if you are doing commercial work just flip to the commercial section). if you are looking up a reference (such as notes from an inspector or on prints) it is useless unless you already know what that NEC number is.

i'm in my second year IEC this book is amazing, Good pics and diagrams with a professional lookLoad Calculation excellentVery satisfied with my purchase!!

No answer key. I called cengage and they don't even have one.

It's a good source to use as a study guide to prepare you for taking the Master's Electrical Exam, as well as, it is helpful to gain understanding of the language of the NEC.

amazing reference book.

Great illustrations, easy to follow text, excellent reference guide to the NEC. Also recommend Electricians Exam Prep. by Charles R Miller

This book is a very good resource with general knowledge base of the NEC. The pictorial diagrams add clarity to the subject matter. Overall this is a good resource to refer to. I prefer the digital edition so I can review questions anywhere.

always used regular code book, but like the way this is set up. but still need to have a code book to keep up with.
