Grade Level: Preschool - 3

Customer Reviews

Patricia J Murphy is the author of several nonfiction books for children.

I am a huge fan of the Rookie Read-About series and was very happy to find this science book dealing with force and motion. I am a kindergarten teacher who was looking for supplemental/introductory materials to use with my force/motion unit of study. The students enjoyed the information and could relate to the concepts presented. I was able to pass this book along to the other kindergarten teachers in my building.

Used this to help teach a science lesson to first graders- With the accurate text to life pictures, the students greatly enjoyed this small book!

Great kids book for science

Great book for teaching kids
