Planting And Establishment Of Tropical Trees: Tropical Trees: Propagation And Planting Manuals (Tropical Trees, Propagation And Planting Manuals Series)

Synopsis

These readable, well-illustrated handbooks have been designed to provide clear and concise information on how to select, grow, plant and care for tropical trees, in both moist and drier parts of the tropics. They are intended for anyone interested in growing trees, from the small-holder to the large-scale grower, from local communities to national governments and from school and further education. They are spiral bound so that they are easy to use in the field. The need to plant tropical trees has never been greater than it is today. Tree planting in the tropics has not kept pace with deforestation. Alongside the desperate need to plant more trees, those planning forestry planting must be aware of local needs – human requirements are of paramount importance. This practical, non-technical guide presents information and simple, practical guidelines for tree planters in the tropics. Line drawings are used extensively to demonstrate planting methods and procedures.

Book Information

Series: Tropical Trees, Propagation and Planting Manuals Series

Spiral-bound: 142 pages

Publisher: Commonwealth Secretariat; Spi edition (August 26, 2008)

Language: English

ISBN-10: 0850927080

ISBN-13: 978-0850927085

Product Dimensions: 1 x 8.8 x 11.8 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 1 customer review

Customer Reviews

"This excellent volume is the last in a series of five practical guides to propagating and planting tropical trees. It has many points to recommend it: extremely clear and straight-forward writing; attractive and helpful line-drawn illustrations; spiral bound and organised as a series of photocopiable sheets, ideal for training purposes, with cross references to relevant sections in other volumes in the series. The aim of the series as a whole is to encourage growing, planting and care of trees 'on any site, by anyone, at any scale'." (New Agriculturalist)

Chris Milner is Professor of International Economics and Research Fellow of the Centre for Research on International Trade and Economic Development (CREDIT) and the Globalisation and Economic Policy (GEP) Research Centre, School of Economics, University of Nottingham.

Very good general introduction. Would need to be accompanied by specific details of individual tree species in each case.
